BRIEF

/ Managed Phishing for Microsoft

LevelBlue

End to end phishing defense for E5 clients – delivered natively in Microsoft

A fully managed phishing solution tailored for your Microsoft environment.

With email being the primary entry point for cyberattacks like phishing, ransomware, and business email compromise, your workforce is the front line of defense.

Being able to quickly identify, neutralize, and respond to these phishing attempts is more critical than ever for your organization.

Microsoft's Defender for Office provides strong, foundational protection and is trusted by organizations worldwide. However, as threat actors adopt more advanced tactics like quishing and social engineering, some of these threats can evade even robust built-in defenses. As a result, organizations struggle to respond effectively to these threats and to educate users on what to watch for.

The LevelBlue advantage

LevelBlue offers the only fully managed phishing solution built natively for Microsoft environments, tailored for Microsoft Office 365 and Defender for Office (E5 or equivalent). Our unique approach includes:

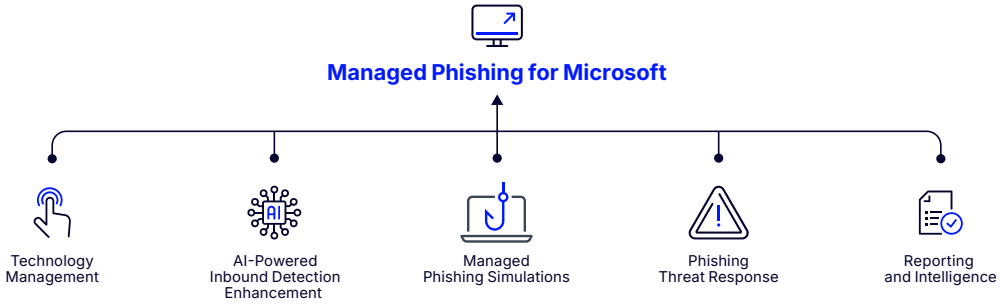
Technology Management
Ongoing configuration of phishing-related policies, rules and tuning to optimize phishing defenses within Defender for Office

AI-Powered Inbound Detection Enhancement
Proprietary machine learning engines detecting evolving phishing attacks before reaching your user's inboxes. This multi-layered protection reduces threat exposure by over 99%

Managed Phishing Simulations
Realistic, targeted monthly simulations to assess and improve employee's awareness of phishing

Phishing Threat Response
24×7 expert analysis, investigation and response to phishing threats across your organization

Reporting and Intelligence
Ongoing analysis of user behavior, attack patterns, and emerging phishing trends leading to intelligent tuning of your security posture



Benefits

- Maximizing the value of E5 and Defender for Office Plan 2
- >99% reduction in phishing attacks
- 25+ years protecting organizations against phishing and BEC
- Reduce burden on your security team
- Layers of proprietary AI-powered detection
- Decades of leadership in email security supported by LevelBlue SpiderLabs elite threat detection security team

Outcome delivered

- Measurable reduction in risk exposure from advanced phishing
- Higher end-user resilience and awareness to phishing threats
- Less internal burden on SOC and IT teams
- Clear reporting and executive visibility into phishing threats

Ready to stop phishing with E5? Strengthen your first line of defense

Let LevelBlue help you unlock the full value of your Microsoft E5 investment with the only end to end managed phishing service that prevents, detects, responds and educates all natively within your Microsoft ecosystem. By combining people, process, and proprietary AI-powered tools, your users become more than just recipients, they become informed, active defenders against the ever-evolving phishing threat landscape.
