

/ LevelBlue MDR + Co-Managed SOC
for SentinelOne

Preferred by SentinelOne. From deployment through response.

Managed security
operations for
SentinelOne, from
deployment through
response.

SentinelOne named
LevelBlue preferred
provider for MDR,
Managed SIEM, and
Incident Response.
One partner
across detection,
investigation, and
response.

SentinelOne's detection is excellent. What decides the outcome is what happens after it fires: who investigates it, who decides, and who acts. That work respects neither business hours nor headcount, and it's the work we do.

What we do

Deploy your Singularity AI SIEM. SentinelOne directs AI SIEM deployment to LevelBlue. We design your data sources, configure the Singularity platform, and build the initial use cases, so detection content is right from day one.

Investigate around the clock. Human-led investigation 24x7 against SpiderLabs threat intelligence. You receive analysis and recommended actions, not forwarded alerts.

Cut the noise, not the coverage. Continuous expert-led tuning removes the alerts that never needed a person, so the ones that reach your team are worth reading.

How it works

Step 1: Deployment. Design, configuration, data source onboarding, and initial use case build for AI SIEM.

Step 2: Co-Managed SOC. Monitoring, investigation, and ongoing tuning of your AI SIEM, with ongoing advisory access to LevelBlue experts who know your environment.

Step 3: Add MDR. Endpoint detection and response, so the same team that investigates the alert can act on the endpoint it points to, with no handoff.

What you keep

Every AI SIEM use case, parser, playbook, and tuning improvement we build on your behalf belongs to you and stays in your environment. We do not hold your AI SIEM hostage.

Backed by SpiderLabs intelligence

Every investigation draws on LevelBlue SpiderLabs: 200,000+ hours of penetration testing a year, 1,000+ threat hunts, and 9,000+ incidents investigated. Frontline findings from real incident response feed the detection content running in your environment.

One partner across your SentinelOne estate, from deployment to response

Who does the work

Information Security Advisory access to LevelBlue experts who know your environment, a 24x7 global SOC behind them, and LevelBlue incident response when it matters most.

2,500+

security professionals across 17+ countries

24x7

coverage with competitive SLAs

300+

incident response experts, 9,000+ incidents investigated, and on 50+ cyber insurance panels

FedRAMP certified

Why LevelBlue

- One team across deployment, SIEM operations, and endpoint response
- 24x7 investigation and competitive SLAs, backed by SpiderLabs intelligence
- Alert noise cut without losing coverage
- Detection content you own and keep, in your environment
- Ongoing advisory access to experts who know your environment
- Preferred provider across MDR, Managed SIEM, and Incident Response
