

SOLUTION BRIEF

Protect External-Facing Services Against DDoS Attacks and Keep Your Business Running

Get Flexibility and 24/7 Monitoring with DDoS Mitigation Services from LevelBlue

Distributed Denial of Service (DDoS) Attacks Are Increasing in Frequency, Volume, and Sophistication

LevelBlue can help provide you with resources to detect and mitigate attacks 24/7. Our DDoS specialists provide the expertise needed to understand the nature of different types of DDoS attacks and how to protect against them.

When a DDoS attack hits, it can do irreparable damage to the business/organization, causing financial, operational, and brand loss. The DDoS market is complex. You need help understanding the market and making sense of all the options.

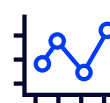

For Example:

Application Layer Attacks

Protocol Attacks

Volumetric Attacks

LevelBlue is Committed to Being Your First Line of Defense to Protect Your Business

We deliver a comprehensive suite of DDoS mitigation services built atop the industry's most advanced technology platforms. By pairing the advanced technology platforms of leading DDoS vendors with the expertise of our DDoS specialists, LevelBlue can detect, mitigate, and help customers to recover from all possible DDoS attacks, including layer 3 volumetric attacks, layer 6/layer 7 application layer attacks, and layer 4/layer 5 protocol attacks.

30 Globally distributed scrubbing centers

We can mitigate your attacks with

24/7 monitoring

0 – 15
sec min

Service Level Agreements (SLAs)

and provide ongoing protection for your business.

LevelBlue Offers Solutions to Fit Your Deployment Scenario

Protect your web-facing properties and locations from being ambushed with DDoS and ransomware attacks.

Geographic Footprint
US and global

Workload Complexity
from branch offices,
data centers, and
global enterprise

Response Time
from zero seconds to
15 minutes service level
agreements (SLAs)

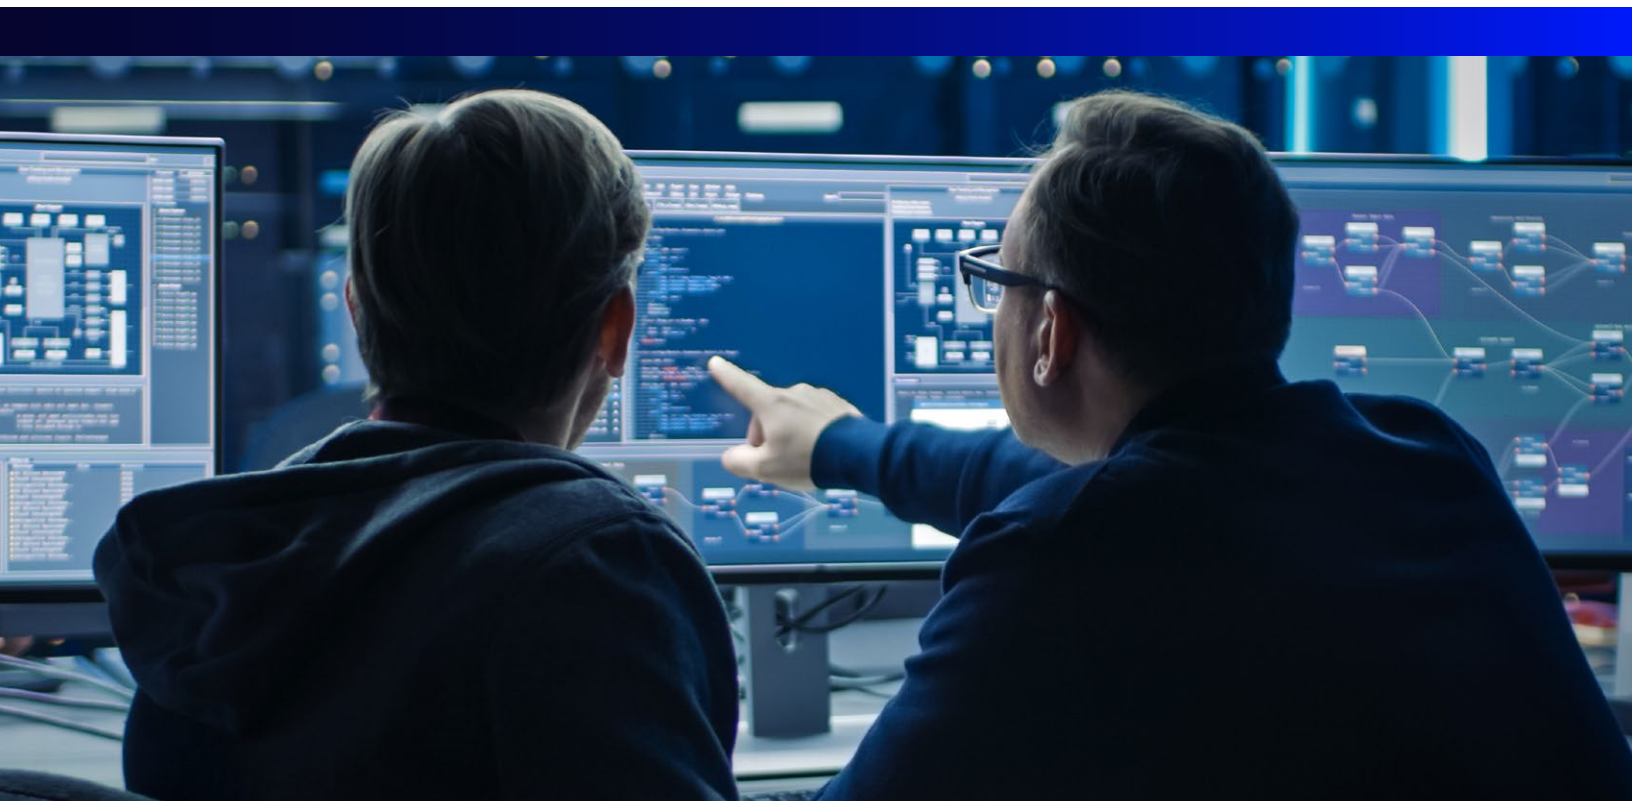

Business Criticality
on demand to
always-on solutions

Network Type
from single-carrier static
networks to multi-carrier
dynamic networks

Scope
Small to enterprise
level organizations

Choose the Defense that Fits Your Business Best:

Emergency Mitigation

Organizations without LevelBlue DDoS

- Emergency mitigation for active DDoS attacks
- Our experts immediately triage the attack, analyze impacts, and restore service
- Implement in as little as one hour
- All geographies and workloads including public cloud
- Mitigation for AT&T and non-AT&T customers
- Contact your LevelBlue representative or call 877-219-3898 for immediate assistance

LevelBlue DDoS Defense

Rely on our core network capacity and scrubbing expertise

- Fully managed service with access to customer portal that enables you to view and manage your DDoS protection profile
- Utilize core network capacity
- Multiple mitigation options (on-demand, platform-initiated) with flexible SLAs to meet the needs of your business
- Can protect individual Internet Protocols (IPs) (No/24 subnet requirement)
- Protects internet circuits in the U.S. Protects AT&T Dedicated Internet circuits in Canada, EMEA, and APAC
- Also available [LevelBlue Reactive DDoS Defense](#). Once you sign up, simply call to enact prompt and efficient mitigation when your servers are under attack

CDN Prolexic DDoS

Less-than-a-second industry-leading SLAs with global coverage

- Fully managed service with access to customer portal (joint management by LevelBlue and its partner)
- Coverage includes unlimited number of attacks / unlimited attack duration
- Multiple mitigation options (on-demand, platform-initiated, and always-on); less than one-second SLA available
- Carrier-agnostic with global footprint
 - Multiple options to deliver clean traffic
 - GRE tunnels and existing internet connectivity
- Direct connections supported using third-party internet
- Globally distributed cloud security platform with less than one-second SLA
- Also available **LevelBlue Content Delivery Network (CDN) Prolexic IP Protect** to protect IP addresses and workloads in the cloud

LevelBlue can uniquely deliver a comprehensive set of DDoS solutions that cover planning, adoption, integration, and management of your DDoS protection program. Our DDoS analysts support 24/7 monitoring and mitigation and help simplify security protection across your web facing applications, cloud and on prem infrastructure, and API attack surface.

About LevelBlue

We simplify cybersecurity through award-winning managed security services, experienced strategic consulting, threat intelligence and renowned research. Our team is a seamless extension of yours, providing transparency and visibility into security posture and continuously working to strengthen it.

We harness security data from numerous sources and enrich it with artificial intelligence to deliver real-time threat intelligence. This enables more accurate and precise decision making. With a large, always-on global presence, LevelBlue sets the standard for cybersecurity today and tomorrow. We easily and effectively manage risk, so you can focus on your business.

Cybersecurity. Simplified.
