# LevelB/ue

Secure Access Service Edge (SASE): LevelBlue and Network Consulting Services SASE moves away from data center-orientated security. Instead, it unifies your network and security tools into a single service delivered via the cloud and provides edge-to-edge protection for remote users and data centers.

As data spreads across multiple locations, cloud vendors, and a variety of endpoint devices, traditional security has relied on protecting organizations from the perimeter. An organization's network architecture should embrace a SASE model to protect direct-to-cloud access while maintaining required connections

to the data center. New business initiatives and processes have created broader attack surfaces. Applications, users, and devices are moving outside of the traditional corporate zone of control, dissolving what was once the trusted perimeter, and enterprise security and networks must evolve to protect the business.

#### **Benefits**

- Reduce risk and help stay ahead of the threat landscape
- Uncover functional and technological gaps, determine readiness
- Address the complexity of implementing policy driven, software-defined secure access
- Develop a strategy and roadmap that addresses planning and budgeting required to realize a SASE deployment

### Our Service Approach

LevelBlue Consulting provides a SASE Readiness Workshop along with Strategy and Roadmap engagements:

SD-WAN, NFV, Virtualization

CASB, SWG, FWaaS, ZTNA

Data Security
Encryption, decryption,

Identity and Access
Identity Management,
Authorization,
Authentication

Analytics Security/Network OPS, SPoG

Use Cases End User Connectivity and Security Profiling

### SASE Readiness Workshop

As customers begin their journey with SASE, it is important to gain a full understanding of what lies ahead. LevelBlue Consulting's SASE Readiness Workshop is a five-segment workshop designed for customers to review current maturity and data requirements, risks, goals and objectives, understand access requirements, and to provide a go-forward plan for future stages along the journey.

### SASE Strategy and Roadmap

The next step in transforming to an IT infrastructure of the future is to define a technology vision for moving to a SASE environment. Strategic planning should focus on aligning industry best practices and best-of-breed architectural approaches with SASE technologies built to deliver diverse, highly secure connectivity and robust performance for mission-critical application services. Using a prescriptive delivery methodology, LevelBlue Consulting will provide the customer with a technology roadmap aligned with their cost-saving and transformation requirements.

### SASE Deployment Services

Having a complete vision, strategy, and roadmap to SASE in place, the next stage is execution. With LevelBlue Consulting's proven experience in design, engineering and deployment services of transformative solutions, coupled with detailed project and program management, LevelBlue Consulting is ready to partner with our customers in a successful SASE deployment.

## LevelB/ue

## **About LevelBlue**

We simplify cybersecurity through award-winning managed security services, experienced strategic consulting, threat intelligence and renowned research. Our team is a seamless extension of yours, providing transparency and visibility into security posture and continuously working to strengthen it.

We harness security data from numerous sources and enrich it with artificial intelligence to deliver real-time threat intelligence. This enables more accurate and precise decision making. With a large, always-on global presence, LevelBlue sets the standard for cybersecurity today and tomorrow. We easily and effectively manage risk, so you can focus on your business.

#### Cybersecurity. Simplified.
